

1. Title

A randomized trial of Drug X versus placebo for Outcome Y: study protocol. ^[1a]

2. Administrative information

Protocol version 2.1, 15 January 2026. ^[2]

3. Methods: Assignment of interventions

The randomisation sequence will be generated by an independent statistician using a computer algorithm. ^[21a]

Simple randomisation will be used, with no stratification. ^[21b]

Allocation will be concealed via a centralised, web-based randomisation system. ^[22]

Participants, care providers, and outcome assessors will be blinded to group assignment. ^[24a]

4. Ethics

Approval will be sought from the regional research ethics committee prior to enrolment. ^[30]
